KEY PROJECTS

HEALTHCARE PLATFORM INTEGRATION AND AUTOMATION

The project involved integrating and automating specific aspects of a healthcare web platform with third-party vendors to enhance the efficiency and reliability of data transfers. I worked on this project as a full-stack developer using C#, ASP.NET MVC and Web API, Microsoft SQL Server, Zapier, JavaScript, HTML, CSS, Azure DevOps, and IIS.

VAT COMPLIANCE PORTAL MAINTENANCE AND DEVELOPMENT

The project aimed to improve the performance and productivity of an existing web portal and add new features to comply with the latest business regulations. I was a full-stack developer working on web application maintenance and implementing changes using C#, ASP.NET, SQL Server, Azure DevOps, IIS, JavaScript, HTML, and CSS.

WAREHOUSE MANAGEMENT SOLUTION FOR SAP BUSINESS ONE

An integrated warehouse management solution for real-time SAP Business One transactions. I worked on this product as a full-stack developer using WinForms with the .NET Compact Framework for handheld devices, C#, ASP.NET Web API, SAP Business One SDK including DI API and UI API, and Microsoft SQL Server on the back-end.
